Mobile: [+91 7610714719](tel:+917610714719)

SKILLS

Languages:	C++, Python, HTML, CSS, JavaScript
Tools/Platforms:	Power Bi, MS Excel, MS SQL Server, VS Code
Soft Skills:	Problem-Solving & Analytical Thinking, Project Management, Adaptability

TRAINING

Cipher Schools (Edtech Company) <u>link</u>	Jun' 25 – Jul' 25
Data Science using Python	
- Conducted Exploratory Data Analysis (EDA) using NumPy and Pandas, resulted 20% decrease in data preparation and cleaning time. - Designed, trained, and assessed multiple Machine Learning models such as Linear Regression, KNN, SVM, Decision Trees, K-Means, and Ensemble techniques with Scikit-learn, leading to an overall performance improvement of around 15%. - Applied effective feature engineering strategies to improve predictive model efficiency and accuracy by up to 25%.	

PROJECTS

Olympic Games Performance Analysis Dashboard Power Bi <u>link</u>	Nov' 25
- Analyzed 120+ years of Olympic data (1896–2016) using Power BI to identify country-wise medal dominance, sport specialization, and participation trends, revealing that top-performing nations accounted for nearly 60% of total medals. - Improved analytical clarity by 40% through interactive dashboards featuring KPIs, slicers, drill-throughs, and navigation buttons, enabling rapid comparison of country, athlete, and sport-level performance. - Implemented time-series forecasting on athlete participation, projecting a 20–25% increase in global participation, showcasing predictive analytics and future trend identification.	
Spotify Song Popularity Prediction Python, HTML, ML Predictive Analysis <u>link</u>	May' 25
- Examined 100,000+ Spotify tracks using audio features such as danceability, tempo, loudness, and duration to identify patterns influencing song popularity, uncovering features contributing to nearly 65% of popularity variance. - Boosted prediction accuracy by 20–25% through Exploratory Data Analysis, feature engineering, and comparative evaluation of multiple machine learning models, selecting the best-performing model based on accuracy and error metrics. - Deployed an interactive Streamlit application with Spotify API integration, enabling real-time song analysis and popularity prediction, reducing manual analysis effort by 40% and enhancing user interaction.	
Loan Prediction Chatbot Python, ML Predictive Analysis, NLP <u>link</u>	March' 25
- Developed an ML-based chatbot for loan eligibility assessment using Python, NLP, and Streamlit/Flask, reducing manual evaluation effort by 35%. - Preprocessed and optimized financial data, improving model performance by 15%, and evaluated classifiers including Logistic Regression and Decision Tree. - Achieved up to 85% prediction accuracy and delivered real-time loan approval results through an interactive conversational interface.	

CERTIFICATES

Responsive Web Design <i>FREE CODE CAMP</i> <u>link</u>	Dec' 23
Introduction to Hardware and Operating Systems <i>Coursera</i> <u>link</u>	Sep' 24
Data Structures and Algorithm <i>Neo Colab</i> <u>link</u>	Dec' 24
Machine Learning with Data Science <i>IBM CipherSchools</i> <u>link</u>	July' 25

EDUCATION

Lovely Professional University	Phagwara, Punjab
Bachelor of Technology	Aug' 23 – Present
Computer Science and Engineering; CGPA: 7.86	
Deepak Memorial Academy	Sagar, Madhya Pradesh
Intermediate: Percentage: 82%	April' 22 – March' 23
Deepak Memorial Academy	Sagar, Madhya Pradesh
Matriculation: Percentage: 88%	April' 20 – March' 21
